Dear Dr. Masten,

I strongly support toxicology testing of the fragrance chemical Iso E Super. There is exposure to materials in fragrance to virtually every segment of the population. The lack of available health and safety data is disturbing. Consumers have no way of evaluating the health risks of scented products.

For ISO E-Super is in products which are using at the whole earth, it is also very important for other countries that the substances in American fragrances are safe.

Sincerely,

Ingrid Scherrmann

Dear Dr. Masten --

The following failure message was redirected to me by Ingrid Scherrmann in an effort to understand why her message to you failed.  I haven't a clue, so thought I'd try to send it from my computer.

Sincerely
Barbara Wilkie
